WIPO Academy Programs

Academy programs

Our rich portfolio of general and specialized courses on IP caters to different target audiences: inventors and creators, business managers and IP professionals, policy makers and government officials of IP institutions, diplomats, students and teachers of IP, and civil society. Courses combine traditional face-to-face and distance learning methodologies and are taught by people well versed in IP to stimulate innovation, creativity and development.

Professional development

General and specialized IP training for diplomats and government officials.

Academic institutions and Start-up Academies

Joint Master's degrees in IP, support for universities in IP teaching, and assistance in setting up national IP training institutions (Start-up Academies).

Distance learning

E-Learning platform for IP courses at basic and advanced levels in up to seven languages.

Summer school

Short IP courses for senior students and young professionals.

5	DL-317 Arbitration and Mediation Procedure under the WIPO Rules	DL317E18S1	15-Jan-2018 to 18-Mar-2018	10-Apr-2018 to 10-Jun-2018	English

PATENTSCOPE (homepage)

PATENTSCOPE

The PATENTSCOPE database provides access to international Patent Cooperation Treaty (PCT) applications in full text format on the day of publication, as well as to patent documents of participating national and regional patent offices.

The information may be searched by entering keywords, names of applicants, international patent classification and many other search criteria in multiple languages.

Technology and Innovation Support Centers

The [WIPO Technology and Innovation Support Center \(TISC\) program](#) provides innovators in developing countries with access to locally based, high quality technology information and related services, helping them to exploit their innovative potential and to create, protect, and manage their intellectual property (IP) rights.

Services offered by TISCs may include:

- Access to online patent and non-patent (scientific and technical) resources and IP-related publications;
- Assistance in searching and retrieving technology information;
- Training in database search;
- On-demand searches (novelty, state-of-the-art and infringement);
- Monitoring technology and competitors;
- Basic information on industrial property laws, management and strategy, and technology commercialization and marketing.

The casual searcher vs. the serious searcher

When most people go looking for information on the internet, typically they will type a few words into one of many common search engines. Presto! The search engine gives them a list of results, which may or may not be relevant to their interest. But when the stakes of a search are higher, if you risk missing an opportunity to receive a patent or losing your business in a patent infringement lawsuit, will you be satisfied with 'good enough'? Probably not. That's why a serious searcher will take a more systematic approach to structuring their searches.

Select **Forward** to find out more.

Quality vs. quantity

As easy as it is to do a casual search, you probably also know that there's a difference between quantity and quality in terms of search results. The difference between a casual search and a serious search is that a serious search will allow you to balance recall (how wide the search is) with precision (how specific the search is).

Patent Landscape Reports (PLRs)

The image is a screenshot of the WIPO website's Patent Landscape Reports page. At the top, the WIPO logo and name are displayed. Below this is a navigation menu with links for IP Services, Policy, Cooperation, Reference, About IP, and Inside WIPO. A search bar is located on the right side of the menu. The breadcrumb trail shows the path: Home > Reference > PATENTSCOPE > Patent Landscapes. The main heading is "Patent Landscape Reports". The text explains that PLRs provide a snapshot of patent activity for a specific technology, region, or globally, and are used for policy discussions, research planning, and technology transfer. An image of gears and circuitry is shown to the right. Below the text, a paragraph describes the process of a PLR, starting with a state-of-the-art search and analysis of results to provide conclusions or recommendations.

WIPO
WORLD INTELLECTUAL PROPERTY ORGANIZATION

IP Services Policy Cooperation Reference About IP Inside WIPO Search WIPO

Home > Reference > PATENTSCOPE > Patent Landscapes On this page ▾

Patent Landscape Reports

Patent landscape reports (PLRs) provide a snapshot of the patent situation of a specific technology, either within a given country or region, or globally. They can inform policy discussions, strategic research planning or technology transfer. They may also be used to analyze the validity of patents based on data about their legal status.

(PHOTO: ISTOCKPHOTO/CQIMJAUHARI1)

A PLR begins with a state-of-the-art search for the relevant technology in selected patent databases. The search results are then analyzed to answer specific questions about, for example, patterns of patenting activity or of innovation. The results are presented visually to assist understanding and conclusions or recommendations based on the empirical evidence are provided.
